

CLEAN, RELIABLE LOW COST POWER

If you spend \$10,000 - \$500,000 per month on electricity contact MBS!

(925) 334-7200

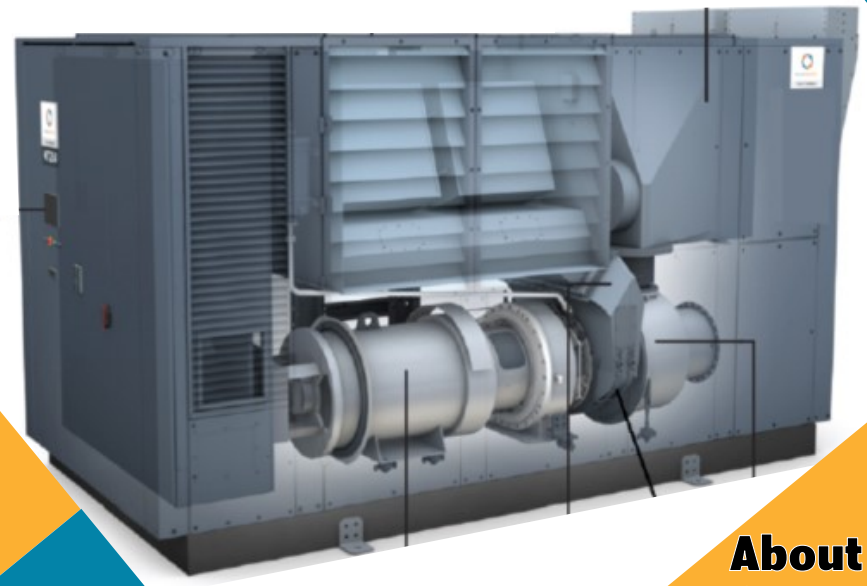

Generated On-Site With Flex Energy Gas Turbines

The Benefits of a Flex Energy Gas Turbine

Flex Energy Gas turbines are plug and play compact generator technology that is:

- Low cost
- Reliable
- Long lasting
- High uptime performance
- Low annual maintenance

About Flex Energy Gas Turbines...

- Combined Heat & Power (CHP) for efficiencies up to 85%
- Available in modular packages from 250kW to 1.3MW
- The highest power density and widest fuel tolerance of any small capacity gas turbine
- Load management by synchronous generator - no batteries needed
- The most robust build quality and lowest emissions in their class

The revolutionary Flex Energy Gas Turbine will:

- Supply heating, cooling and electricity
- Free your business from the power grid
- Reduce your emissions
- Lower electricity costs by up to 50%

Why MBS Engineering?

MBS Engineering is renowned for protecting the West Coast with gas safety solutions for over 20 years. We are the undisputed experts when it comes to the installation and configuration of any gas system.

Our utility technicians and engineers analyze your current and future energy requirements recommending the best on-site power strategy for you.

The Perfect Partnership For Your Energy Needs

As a trusted installer and Channel Partner of Flex Energy Gas Turbines, MBS Engineering leverages our experience in the industry, to bring you an unparalleled level of engineering and support services.

What We Do

Complete natural gas utility services and systems design.

Our Clients Include

- Sutter Hospitals
- Stanford Hospitals
- Contra Costa Firehouses
- Piedmont School District
- Alameda Unified School District
- Skyline College
- Canada College
- San Mateo City College
- Spanish Bay HOA, Pebble Beach, CA
- Oak Creek Association, Walnut Creek, CA

Financing is Available

- Equipment Loans
- Equipment Leases
- Power Purchase Agreements
